## A View of Hot Springs, South Dakota.

This resort is rapidly becoming the most famous health and pleasure resort in the West. Altitude, 3,500; climate, delightful; water, just about the temperature of the body, requiring neither hot nor cold water to temper. Hotels: The "New Minnekahta," which was completed in 1892, is an elegant, modern, stone building, 150 feet square, and complete in all appointments. Gillespie and Hot Springs House, both large, stone buildings, nicely equipped and managed; many smaller hotels and private boarding places.

# STREET AND AVENUE GUIDE

AND

## DIRECTORY OF HOUSEHOLDERS.

(Entered according to Act of Congress, in the year 1895, by R. L. Polk & Co., in the Office of the Librarian of Congress at Washington, D. C.)

In the following list the streets are arranged in alphabetical order, the intersecting streets being shown, the number of each building on the street is given in numerical order, and opposite the number is placed name of the occupant householder. In the business blocks containing offices the occupant of each room is shown by numbers where practicable. In all streets excepting Woodward avenue and Griswold street both sides of the street are included in one list, but owing to the large number of offices, etc., on these streets, a division was necessary to make the information comprehensive. The territory included in the Householders' Directory is bounded as follows: Baldwin avenue on the east, Milwaukee avenue on the north, and Military avenue on the west. The outlying districts are composed, largely, of streets without numbers, or incorrect and scattered numbers, and it was not thought advisable to include them in this issue. In streets not included in the list of householders the former plan of locating intersecting streets has been followed. The profession, business, etc., of individuals and firms are only given at their respective places of business; to find the occupation of householders, refer to Alphabetical List of Names. The exact location of any street can be found by referring to the Index on Map.

The odd numbers appear on left hand side of all streets, from the lowest to the highest.

\*Indicates that the number agrees with that on house, though out of its regular order.

†Indicates telephone holder.
