

JewishGen Education Why Take A Class

Taking a class is like constructing a puzzle from the pieces you have at the start

Let's start by imagining

Each one of us has a puzzle.
A puzzle we want to solve

1. Let's translate our imagined solved puzzle
what will the finished product look like
Now translate it into a written goal
2. Once the goal is set: This will be your reference
picture (success for you)
3. When completed this goal is set to reflect your
desired outcomes.

Where are my missing pieces?

Construct your story

1. Create and plan strategies for assembling the
puzzle
2. Spread out the pieces you already have
what records are you missing?
3. Finding pieces:
Write out 3 objectives
What do you need and What are the ways you will
work on assembling the missing data or where will
you look for the missing data.

Much of today's genealogy work requires creating
your own puzzle pieces and then hoping you
analyzed them correctly and that they fit together
logically.

collaborate
collect
combine
Connect

Start Here:

What will you do with the pieces you already have?

If you have one piece who has the other?

How will you find it? Where will you find it?

Why take a Class? A Class can help you

Define the scope and build a research structure.

Define a finished research project

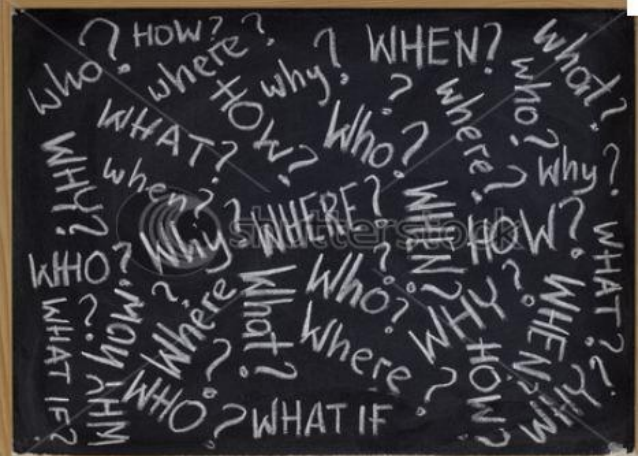

Deal with missing pieces

Analyze your Data and Move forward

A Class give you Skills

- **Skills for Finding Pieces**
- **Skills for Developing search strategies**
- **Skills to Organize your Data**
- **Skills for using Internet Genealogy Sites**
- **Skills for working in Foreign Archives**
