Author's Note :

This list gives the names of Moscow people removed by *étape*, and the places to which they were sent. Those towns marked (*) are not in the Pale. That means that one-fourth of these Jews were either twenty-five-year veterans or were otherwise of the privileged classes permitted since 1865 to reside anywhere, and that, when removed from Moscow during this last year, their domicile reverted to some other place where Jews were not allowed to reside, and from which they would also in time be chased. In three cases the same name occurs twice - where people ventured back to save some relic of their property or collect a debt, and were again expelled. The names of women are in italics.

Transcriber's Note: Frederic's list was numbered, not alphabetized; the numerals following each name show its position in the original list (CMS).
